Logitech diNovo Wireless Keyboard for Notebooks
Posted by admin on January 27, 2009 under [Home](#) | [Reviews](#) | [Be the First to Comment](#)

This keyboard has a very stylish look, and connects to any PC desktop or notebook via USB 2.0. This keyboard is very sleek, and gives you a sense of sophistication. The aluminum wrist rest is something rarely seen on a keyboard. Logitech claims that the keyboard will stay powered for three years... continue reading [here](#).

NanoLite
Posted by admin on under [Home](#) | [Reviews](#) | [Be the First to Comment](#)

World's Smallest Adhesive Light

The NanoLite is the world's smallest adhesive light developed by Arizona based January Innovations, Inc. No tools or assembly are required. Just pull off the adhesive protector and stick it on the key. It's that easy. Because of its small size and advanced 3M tm adhesive, NanoLite sticks to any size key. The NanoLite costs just \$2.99... continue reading [here](#).

NanoLite

World's Smallest Adhesive Light

The NanoLite is the world's smallest adhesive light developed by Arizona based January Innovations, Inc. No tools or assembly are required. Just pull off the adhesive protector and stick it on the key. It's that easy. Because of its small size and advanced 3M tm adhesive, NanoLite sticks to any size key. The NanoLite costs just \$2.99 which is definitely worth it if you have used a keychain light just once in your life. I put the samples

provided on both of my keys and have already used them multiple times. You can read more about this clever product [here](#) at the product's home page.
